Mettler electronics sonicator plus 994 manual

Double frequency ultrasound with an applicator 5 cm2. Buy now ME740 ultrasound applicator; The 5cm2, 1 and 3 MHz, includes the UIASTM tool and O-ring Buy now two channels digital OTC TENS/EMS device for pain relief Buy now Sonicator Plus combination therapy units combine ultrasound with electrical stimulation in one compact package. These units combine the quality and ease of use embodied in Sonicator's therapeutic ultrasound and SysStim stimulants. Multiple stimulating wave forms and double frequency applicators for therapeutic ultrasound were included in these installations to enhance their usefulness. Designed by both an easy-to-use and affordable combined device, the 994 is ideal for any practice. This allows for pain treatment, reduced muscle spasm, muscle recovery and muscle strengthening. 994 uses two independent controls for the IFC. Having two independent controls for the IFC allows the doctor to meet each person's needs when it comes to pain. This flexibility is amazing. Built in protocols on 994 are based on proven scientific research. All Mettler stimulation devices offer high-quality and extremely effective security features. Internal error codes are designed to recognize when there is a problem and alerts the doctor. If a problem occurs, 994 will stop working and submit an error code to fix the problem. In addition to 6 wave-shaped, the 994 also offers a double ultrasonic frequency that comes in standard with a 5 cm2 applicator. Ultrasound can be performed on its own or in combination with Premod, Frequency Medium, Biphasic, and Hi-Volt. Adding a patented direct crystal contact to the patient and a universal applicator cable makes 994 an outstanding combination therapy device. Weight: 10.7 lbs, (4.9 kg.) Dimensions: 5 in (H) x 14.5 in (D) x 10 in (L), 12.7 cm (H) x 36.8 cm (W) x 25.4 cm (D) Guarantee: 2 years on the block, 1 year on the applicator and cable specification sheet q; Can I treat one patient with stimulation and one patient with ultrasound at the same time? Answer: Yes. 994 offers 5 independent timers, so you can treat up to 5 patients at the same time. In: How many patients can I treat at the same time as 994? A: At the same time it is possible to treat up to 5 patients or 5 treatment areas. In: Can I do combination therapy with 994? Answer: Yes. 994 allows you to provide stimulation on its own, ultrasound itself or stimulation and ultrasound together in combination therapy. In: Can I purchase various applicators for 994? Answer: Yes. 994 will be accepted by two other applicators. 1cm2 (#7331) and 10cm2 (#7310) applicators will run on 994. The question is: What is the difference between 994 and 992? A: 992 is a combined device from 2 channels, and 994 - a combined device of 4 channels. The question is: Which electrodes will work only 994? A: The higher the quality of the electrode, the better the treatment. We recommend using either Mettler equalizer Trode Trode Mettler V-trode product line.
